Git & GitHub · Vercel · Netlify · Google AppSheet · VS Code · Chrome DevTools

Also

Python · Java · Networking (Cisco, MikroTik) · Photoshop · Illustrator

Md Rasheduzzaman

M.Eng IT student @ Frankfurt UAS · Full-Stack Developer (React / Next.js)

Open to Werkstudent roles

PROFILE

I build web apps with React, Next.js and Node.js, and I'm studying for a Master of Engineering in Information Technology at Frankfurt UAS. Before that I spent five years in technical support and product management, where I learned to turn real user problems into tools people actually use.

EXPERIENCE

Senior Executive, Technical Support & Product Management

Nov 2020 – Oct 2025

Global Brand Private Limited (Panda & Ugreen) · Dhaka, Bangladesh

Technical and operational support for the Panda product line, plus internal tooling and e-commerce operations.

- Designed, built and maintained an internal Product Management app in Google AppSheet: product details, stock and location tracking, real-time order status, and team, branch and top-buyer reports.
- Resolved technical inquiries from branches and partners and ran on-site product training.
- Tracked team and branch KPIs in performance reports to support management decisions.
- Coordinated the company website and eShop listings and promotions, and managed the Ugreen brand's social media.
- Prepared orders, payment sheets, price approvals and price lists with high accuracy.

PROJECTS

mosharof.com: Portfolio Website for Mosharof

mosharof.com

Next.js · React · Node.js · Express · MongoDB · Tailwind CSS · ImgBB API · Vercel

A responsive, SEO-friendly portfolio website I designed and built for Mosharof to present his professional work and experience. It is built to load fast, meet accessibility standards and grow easily as he adds new content.

- Responsive layout: Tailwind CSS and reusable components adapt cleanly to desktop, tablet and mobile.
- Image hosting: images are uploaded and served through the ImgBB API.
- Performance: code splitting, lazy loading and optimized assets keep pages fast.

mrashed.me: Personal Portfolio & Content Management System

mrashed.me

Next.js · React · Node.js · Express · MongoDB · Tailwind CSS · React-PDF · JWT · ImgBB API · EmailJS · Framer Motion · Vercel

My personal portfolio, built as a small full-stack system rather than a static page. The public website presents my experience, projects, achievements and blog, and everything on it is managed from a private admin panel without touching code.

- Admin panel: secure sign-in (scrypt-hashed password, JWT session cookie, rate-limited login) to manage blog posts, projects, achievements and the full profile.
- Profile editor: each section (basics, experience, education, training, skills, languages, social links) is edited and saved independently.
- Live CV generation: a downloadable PDF CV built on the fly with React-PDF from the current profile data.

EDUCATION

Master of Engineering in Information Technology

2025 – present

Frankfurt University of Applied Sciences, Frankfurt am Main

BSc in Computer Science & Engineering

2016 – 2020

Daffodil International University, Dhaka

Higher Secondary Certificate (Science)

2013 – 2015

Sherpur Govt. College, Sherpur

Secondary School Certificate (Science)

2011 – 2012

Alir Para M. U. High School, Baksiganj

TRAINING & CERTIFICATIONS

Complete Web Development

2022 · 6 months

Programming Hero, Dhaka

React, Node.js, Express, MongoDB, REST APIs · Firebase Auth & Hosting, Stripe, Vercel, Tailwind CSS
